A BEST FRIEND'S BEST FRIEND!

ALUMILENE™

PATENT PENDING

Storage and a place to store it is a precious commodity. We all seem to take more and more stuff along every time we go hunting, fishing or whatever our addiction may be. More stuff, where do we put it all? How do we organize it all? Dogs, expensive dogs, not one dog but two dogs; shock collars, collars, leads, vests, and that's just for the dogs. We really do not want to talk about us and all our stuff. Being an outdoorsman, we understand the frustrations that can occur. If you are unorganized it can cost you time and money. We

think we are typical of most outdoorsmen when we buy something. We buy quality, and hate buying it twice if you know what we mean.

Alumilene products were developed to maximize the use of space in your pickup or SUV. Alumilene's unique integrated slide system makes that possible. Maximizing space and being organized is the key to a successful trip. Alumilene's dog kennels, dog gear storage, vaults and kargo glide can give you what you want and need to maximize your space and to get and keep yourself organized.

Alumilene products are made of very high quality materials. These materials are impervious to the nastiest of elements and conditions. Alumilene products are for those who want the best.
